Leading Northwest Industrial Contractor Opens New Washington Office

PORTLAND, Ore. – One of the Northwest’s leading full service industrial general contractors and fabricators is expanding its presence into the state of Washington. Greenberry Industrial, which provides mechanical, structural, and civil construction and fabrication services, announced today that it is opening a new office in Burlington, Wash., to better serve its growing client base in the state.

“A Washington office will give our customers in the area better access to all our services,” said Greenberry Industrial President Jason Pond. “In addition, we expect a local presence to pave the way for new opportunities in the petrochemical, aerospace, energy, pulp and paper, port terminals and high technology industries. We plan to hire local talent to augment our resources.”

Greenberry’s new office, its third on the West Coast, is located at 235 North Hill Boulevard in Burlington. The main phone number is 360-707-5638.

Strong Northwest Presence

Based in Corvallis, Ore., Greenberry Industrial is no stranger to the Washington construction market, and attributes 50 percent of its revenue to the state. Last year the company transformed the Port of Everett into a top cement distribution facility, and was recognized for its efforts by the Northwest Construction Consumer Council (NWCCC) with a 2007 Distinguished Project Award in the NWCCC’s Private Projects Over \$10 Million category.

According to NWCCC Executive Director Greg Toy, the Port of Everett project hit on all cylinders when it came to the judging criteria of safety, budget, schedule and successfully meeting the challenges. In the end, the company completed the Port of Everett project in 175,000 total hours without a single lost workday due to injury.

Greenberry Industrial, a leading industrial contractor, is opening a new office in Burlington, Wash. The company is familiar with the Washington construction market, having won a 2007 Northwest Construction Consumer Council (NWCCC) Distinguished Project Award for its work on the Port of Everett, above.

(more)

In addition, as one of Oregon's top 150 private companies, Greenberry Industrial has been recognized for several high profile projects in its home state this past year.

The company captured two 2008 Top Project honors given out by the *Daily Journal of Commerce* in the \$15.1 million to \$50 million private renovation category. Greenberry was singled out for its work with Ash Grove Cement Company's new processing complex in Portland, Xerox's solid color ink production site in Wilsonville, and fabrication and installation of a new wood chip storage and feed system for Weyerhaeuser in Springfield.

Well known for its safety record, Greenberry Industrial recently surpassed 1.5 million consecutive man-hours since its last lost time accident.

About Greenberry Industrial

Greenberry Industrial is a full service industrial general contractor serving clients throughout the United States. The company manages and provides all structural, civil and mechanical disciplines in industrial construction including boiler making, civil and concrete, heavy rigging, millwright and equipment setting, pipe spooling and steel erection. Greenberry has offices on Kruse Way in Portland, in Burlington, Wash., and in Corvallis, Ore. More information on the company can be found at www.greenberry.com.
